

# HUPFER

we make work flow

## MORE THAN MEETS THE EYE

Towering strength – monumental design

# VARIOCART

An iceberg floating in the ocean, with a large portion submerged below the water line. The submerged part is overlaid with a blue wireframe grid. The sky is blue with white clouds.

The VARIOCART by Hupfer

# RELIABILITY REDEFINED

A general purpose trolley has to withstand a lot: endless kilometres, tonnes of weight and countless bumps. Again and again. That is why Hupfer has questioned the concept of general purpose trolleys from the ground up and simply rethought it.

#### The result:

A product in which endless hours of intelligent design have been invested and which has proven its resilience in numerous tests. A general purpose trolley that runs longer than you'll ever need it to. One, that can take more, than you will ever put on it. A trolley that goes the extra mile for you. VARIOCART.

## VARIOCART KEY FACTS

Up to **300** kg

load capacity and  
100 kg shelf load ensure  
an enormous durability

**11** Levels

fine pitch for your  
individual configuration

**2** Euro-  
containers

or 4 water crates per shelf  
thanks to the Euro container  
format of 600×400 mm

**75** %

less transport volume  
required due to the  
flat pack design

## Efficient with Euro containers

Shelves in Euro container size save work and time – 2 Euro containers or 4 water crates.

## Strong and durable

Extra-strong welding seams and a smart shelf connection outlast tough applications.

## Green and compact

The 75% smaller flat pack reduces transports, storage costs and the ecological footprint.

## Safe and sound

Adjustable board heights & ergonomic handles improve handling & promote healthy posture.

# STRONG, STRONGER, VARIOCART

Durable shelf connection and strong welds for maximum load capacity

The VARIOCART withstands the toughest tasks.

- **Durable shelf connection:** The shelf connection absorbs shocks and dynamic forces during handling.
- **Unbreakable:** An optimised welding procedure for an extra strong connection between shelf and tube.
- **Special shelf profile:** For a particularly high load capacity and excellent hygiene.

## FOR YOUR BACK

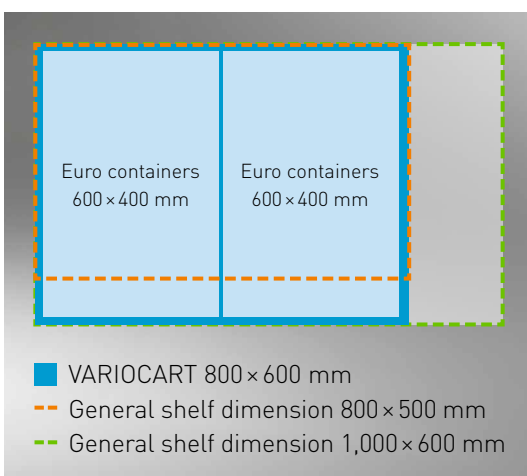

The VARIOCART makes work easier and also healthier.

- **Ergonomic posture:** Ergonomic handle for a more upright walk and more legroom when pushing.
- **Back-friendly:** Adjustable top shelf for optimal working height up to 900 mm.

# MADE FOR EURO CONTAINERS

The VARIOCART complements existing Euro container logistics solutions and thus offers real added value.

- **Optimised:** the shelves are matched to the Euro container format of 600×400 mm and is thus more efficient than the previously common dimensions of 800×500 and 1,000×600 mm.
- **Compatible:** Highly compatible with other common logistics systems, such as pallet and roller container logistics, conveyor belts and sorting systems.
- **Generous:** When three shelves are used, the clearance between the individual shelves is 290 mm – perfect for handling common Euro container heights, such as the 200 mm high container.

## MODULAR ALWAYS FITS

The VARIOCART can be perfectly adapted for every task.

- **Foolproof assembly:** The VARIOCART can be set up in less than 10 minutes.
- **Thought ahead:** Individually extendable and interchangeable with additional shelves, ergonomic handle and spare parts.
- **Climate neutral:** The flat pack box can be sent by parcel services in a climate-neutral and thus environmentally friendly way.
- **Less space required:** The flat pack box saves valuable space during transport and storage – up to 75% less space required.\*

There is a lot more to come.
